

Early Childhood Integrated Pathways

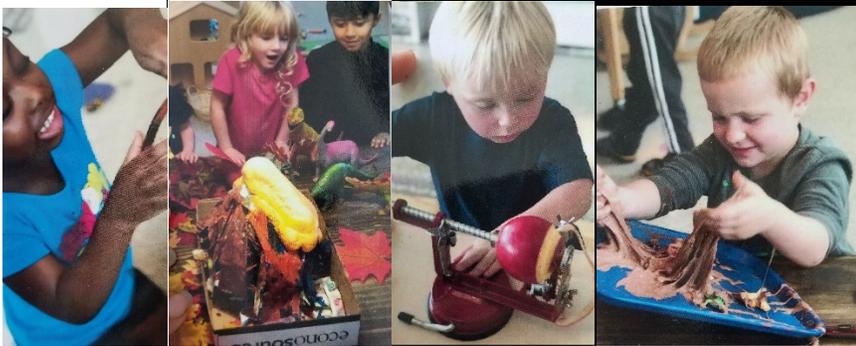

Welcome to the Integrated Program

Who are we??

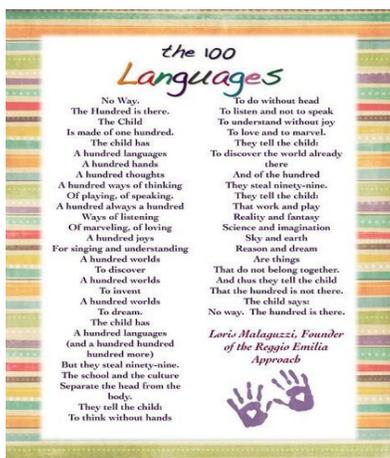

Educational Philosophy

We are a program that celebrates diversity and deeper learning. We are an all-inclusive and diverse group of learners made up of children with varying abilities. We believe all children can learn together and benefit from each other. Our classroom is Reggio Inspired, therefore we are student centered. We believe all children are strong, curious, and capable learning from the world around them.

We are teachers who have daily conversations with our students to show we care about their personal, social, and academic needs. We take into account each child's unique culture and personality, weaving it into their learning. Our teaching team is made up of a General education and Special education teacher. We are a program for 3Year Old Children located at Busy Bee's (Richard L. Johnson). We are a part of BCSC. We offer classes 4 days a week (Monday-Thursday) on a half day basis (am or pm). We provide transportation to and from school. The program's cost is \$75 a week with no scholarships available. Registration packets are available at Busy Bee's (Richard L. Johnson Johnson) or the BCSC Administration Building, Special Education office.

Here are some quotes from some of our parents.

"Susanna's social and communication skills have improved tremendously since she joined the IP program. This program is awesome!"

"The Reggio Style of learning in the IP classroom is amazing. It works well with my boys and allows them to learn what challenges them"

"As a mother of twins, it is important to me that each child have the opportunity to discover their own personalities, likes and dislikes. This program and the teachers foster each child as an individual and allow them to develop at their own pace while gently pushing them to their full potential. We couldn't be happier"
