

Bartholomew Consolidated School Corporation
Extra-Curricular Consent Form

(Extra-curricular includes athletic, co-curricular, and extra-curricular activities.)

_____ (Print student's name.)

has our permission to participate in this program and in the extra-curricular programs of BCSC, and we hereby consent to be subject to its terms **for the semester the consent form is signed and, if still enrolled in school, for the following semester**. We accept the method of obtaining urine specimens, testing, and analyzes of such specimens, and all other aspects of the program. We agree to cooperate in furnishing urine specimens that may be required from time to time.

Results of the test will be shared with the Student Assistance Director, the student, the family, and, if necessary, the BCSC personnel supervising the activities and the driving privileges affected.

We understand that the Bartholomew Consolidated School Corporation's Random Drug Testing Policy for the high school programs requires that:

1. A consent form must be signed by both student and parent/guardian in order for the student to participate in athletic, co-curricular, and extra-curricular activities.
2. A student will be a part of the random, drug-testing procedure from the time the consent form is signed until the end of the school year.
3. A drug-testing company, not a school official, conducts the test and the random selection of students to be tested.
4. A student may be selected multiple times by the company's computer program for random selection.
5. The testing will be done privately, with the door closed and with the testing company monitoring -- but not watching the collection process -- from outside the restroom facility at school.
6. Testing positive for a prescription medication is not a failed test if verification of the medication in that student's name (either by copy of the prescription or by the doctor's authorization) can be supplied to the testing company.
7. BCSC will pay for all selected random screens and for an additional screen if the individual's screen tests positive for a substance other than tobacco.
8. The consequence for testing positive for nicotine is that the parent/guardian is informed of the results.
9. A diluted test may require retesting.
10. An adulterated test is considered a positive test.
11. The consequence for refusing to test or for a positive test to a substance other than nicotine that cannot be verified through a prescription is the loss of the following privileges until a negative screen can be provided for the testing company used by the school:
 - a. the loss of athletic, co-curricular, and extra-curricular privileges and
(Note: An alternative assignment will be provided by the sponsor or director when a co-curricular program/event that is required for credit is missed because of a drug screen result.)
 - b. the loss of school-driving privileges
12. All families of students who are tested will receive results either by phone or by mail from the BCSC Student Assistance Director (376-4449).
